

Colibri Heart Valve 2017 Summer Internship Program

BROOMFIELD, CO – March 24, 2017 – Colibri Heart Valve LLC, a privately held emerging medical device company focused on structural heart applications, has partnered with the Colorado Department of Labor and Employment through the Innovative Industries Program and is looking for a candidate to participate in a thirteen (13) week biomedical engineering summer internship program.

Position Summary:

Over the course of thirteen weeks, the intern will learn the ISO 13485 accredited Product Development Department's objectives and procedures while contributing to the departmental operations. The intern will be responsible for daily tasks, weekly tasks, and ongoing projects.

Periodically, he or she will have the opportunity to shadow in other areas of the business. In addition to illustrating how the Product Development Department fits in with the company as a whole, these shadowing opportunities will expose the intern to potential career paths outside of the Product development Department. The internship will culminate with a final presentation to management describing what the intern learned and the value he or she provided to the company.
